Irvine, California

Evergreen Oil, Inc. and its engineering affiliate, Chemical Engineering Partners (CEP), have moved their headquarters to a new location in Irvine, CA. Evergreen Oil, Inc. is one of the largest collectors, handlers and recyclers of automotive and industrial wastes in California. Evergreen Oil operates a state of the art re-refinery in California which produces API Group II base oil. Chemical Engineering Partners, is a world leader in re-refining design and process technology. CEP has designed re-refining plants that are operating around the world.

“The new offices were designed to be employee friendly,” said Gary Colbert, President/COO. “With the expansion of our re-refinery in Newark, CA and the growth of our business, we needed more room.”

The new offices are located at 2415 Campus Drive Suite 225, on the corner of Von Karman Ave. and Campus Drive, in the heart of the Irvine business district. The offices are nearby John Wayne Airport. Situated on the second floor, the new building offers a great working environment for the employees of Evergreen and CEP.

In addition to its re-refined oil products, Evergreen Oil is recognized as a major provider of hazardous waste collection services offering customers across the State a full range of environmental services and products to handle all of their waste management needs. CEP is a world wide leader in re-refining design with technology that produces API Group II base oils.
